

AlphaCard ID Suite Print Server & Print Server Manager

Easily design, manage and print from multiple PCs to multiple ID Card printers

Powerful ID Card Software

As the premier solution for ID card production and data management, AlphaCard ID Suite combines user-friendly design and automation tools with a sophisticated platform for storing and organizing records for any professional application.

New with AlphaCard ID Suite v11, the software now includes an enhanced card design wizard, improved database functionality & connectivity, high resolution barcodes, and improved language translations.

Features

AlphaCard ID Suite Print Server editions are specially designed for organizations that use multiple ID card printers and manage high volumes of ID cards from one or more work stations.

Print Server comes bundled with ID Suite Business Server edition, and can be used on up to five computers simultaneously. It allows an organization to print with up to five ID card printers.

Print Server Manager comes bundled with both ID Suite Print Server & ID Suite Business Server and can be used on up to five computers simultaneously. It acts as a load balancer, and allows printing with up to 25 ID card printers.

SYSTEM REQUIREMENTS: 32 or 64 bit Microsoft Windows operating system (Windows 7, 8, 10), Server operating system (Windows Server 2008 R2, 2012), Internet Explorer 6 or higher, Microsoft .NET framework 4.0 or higher, dual-core processor, 1 GB internal memory (32 bit) or 2 GB internal memory (64 bit), 200 MB free disk space, internet connection.

Highlights

- Bundled with AlphaCard ID Suite Business Server (Standard, Professional or Elite)
- Use on up to 5 PC's simultaneously (unlimited number of installations)
- Print Server allows printing with up to 5 ID card printers
- Print Server Manager acts as a load balancer for up to 25 ID card printers
