Launch Your ID Card Program with Complete Confidence

Datacard® TruCredential Basic Card Issuance software is the ideal starting point for organizations that want to make their people and premises more secure. Built for a single-station user, TruCredential Basic Card Issuance software delivers the core tools you need to easily design, print and manage ID cards and credentials. This user-friendly software offers you a complete solution for issuing basic IDs. Plus, you can easily scale up to another, more feature-rich edition in the TruCredential Suite as your needs grow.

Ease of Use. Drop and drag features make the software intuitive and easy to use. This allows users to spend less time learning and more time creating new credentials.

- Provides browser-based applications that do not require an Internet connection

- Provides administrators with an intuitive interface to build the right workflows and card design; everyday users can automatically follow a standardized process to improve accuracy

- The quick start tool gets users from initial login to print with minimal setup and configuration.

Configure to Meet Your Needs. Settings can be configured to allow everyday users the ability to capture the data they want, how they want, ensuring only the proper information is captured

Integrates with Microsoft Excel and Access: Easily integrate your existing data sources (such as Microsoft Excel, Access* or SQL Server*) for enrollment

Up-to-Date Technology:
- Working seamlessly with new technologies including Windows 10 and Edge Browser
- Improving output speed by queuing up multiple cards in the printer

*Available with TruCredential Plus Edition
