

# DATACARD® TRUCREDENTIAL SOFTWARE INTEGRATED SOLUTIONS PROFESSIONAL & ENTERPRISE EDITIONS

## YOUR PROGRAM, YOUR CHOICE

The Datacard® TruCredential Suite offers an edition that's just right for you — whether you're just starting a credential issuance program or need to grow your current capabilities.

### TruCredential Software, Professional

- Smart card support
- Decentralized data capture
- Centralized data management
- Microsoft Active Directory integration support
- Oracle database support
- Document scan capture support

### TruCredential software, Enterprise

- C.Cure PACS Integration
- PeopleSoft HR system integration support
- Higher scalability up to hundreds of user stations.
- Easily integrated via TruCredential's web service integration tool

## A True Enterprise Solution for Streamlining Your Enrollment, Issuance and Data Management

When you need to issue credentials with higher levels of security, Datacard® TruCredential Integrated Solutions software provides a next-generation solution. This modern, intuitive, browser-based platform provides the core software tools needed to design, print and manage IDs and credentials. TruCredential Integrated Solutions software also allows you to streamline your organization's enrollment, issuance and data management with enhanced features and functionality.

**Enhanced Features.** Issue more sophisticated credentials including smart cards, with pre-built support for configuring smart card personalization options.

**Integrates with Enterprise Software.** Integrate with a variety of enterprise level solutions, including any system that offers RESTful web service APIs.

**Easy to Deploy Within Organization.** This web based software allows users to easily deploy and manage the software across their network or campus. The fact that a dongle is not required allows the software to be on multiple computers at the same time, and you only pay for concurrent users, not per license.

- Centrally manage credential designs, workflow templates and printer configurations while still allowing data capture from distributed locations while providing an audit trail.
- Install and configure client workstations quickly
- Restrict user access using the role-based access control mechanism.
